CHAPTER 6

STAFFING

CHAPTER ESSENCE AT A GLANCE:
Master human resource management: estimating manpower requirements, internal vs external recruitment avenues, rigorous multi-tier selection process, and worker training vs development.

4 CORE PRINCIPLES TO UNDERSTAND FIRST

• **Staffing as Human Capital Gateway:** Putting people to jobs: finding the right person for the right job with right qualifications, ensuring optimal utilization of human talent without under- or over-staffing.

• **Sequential Staffing Process:** Eight stages: Estimating Manpower Requirements, Recruitment, Selection, Placement and Orientation, Training and Development, Performance Appraisal, Promotion and Career Planning, and Compensation.

• **Recruitment Sources Comparison:** Internal sources (transfers and promotions) foster employee loyalty at low cost but limit fresh talent; External sources (campus, advertisements, placement agencies) bring fresh blood and wider choice.

• **Selection as Negative Process:** Recruitment is positive (attracting applicants); Selection is negative (eliminating unqualified candidates via scrutiny, tests, interviews, reference checks, and medical exams).

ESSENTIAL FORMULAS & GOVERNING EQUATIONS

$$\text{Staffing Golden Rule} \iff \text{Right Person} + \text{Right Job} + \text{Right Time} + \text{Right Qualifications}$$

Human Resource Optimization Axiom

$$\text{Manpower Audit} = \text{Workload Analysis (Number Needed)} - \text{Workforce Analysis (Number Present)}$$

Net Organizational Hiring Requirement Formula

$$\text{Recruitment (Positive)} \iff \text{Attract Candidates} \quad \text{vs} \quad \text{Selection (Negative)} \iff \text{Filter Out}$$

Talent Acquisition Pipeline Dynamics

$$\text{Training (Job Skills)} \quad \text{vs} \quad \text{Development (Total Career Growth)}$$

CRUCIAL EXAM PRECAUTIONS & VALUATION RUBRIC SECRETS

• **Alert:** Workload analysis reveals the number and types of personnel required for planned jobs; workforce analysis reveals the number and types of personnel already available.

• **Alert:** Recruitment is considered a positive process (encouraging more applicants to apply); selection is a negative process (rejecting candidates to pick the best few).

• **Alert:** Apprenticeship training is primarily for technical trades (electricians, mechanics); vestibule training uses dummy equipment in classrooms away from actual factory floors.
